

Business Analyst Study – Your Doctor

1. Overview

Your Doctor is an **AI-powered medical assistant** available 24/7 worldwide. It provides **culturally-adapted healthcare guidance** for everyone, no matter where they live, their income, or local healthcare access.

2. Problem

- 4.3 billion people lack basic healthcare.
- Many regions have very few doctors (e.g., 0.29 per 1,000 people in Sub-Saharan Africa).
- Long wait times and high costs prevent care.
- Most medical apps are **English-only** and Western-focused, causing low trust in non-Western countries.

3. Solution

Your Doctor offers:

- AI symptom assessment in **45+ languages**
- Guidance for local healthcare systems
- **Offline functionality** for low-connectivity areas
- Telemedicine with **verified doctors**
- Emergency support and **medication management**
- Health education adapted to culture and literacy

4 .Key Features

1. **AI Diagnostics** (1,200+ conditions, regionally adapted)
2. **Healthcare System Navigation** (insurance, cost, provider guidance)
3. **Multilingual Medical Conversations** (45+ languages, voice & visual support)
4. **Offline-First Architecture** (works on 2G/3G networks)
5. **Telemedicine Network** (verified doctors, prescriptions, payments)
6. **Emergency Response 24/7** (panic button, family alerts, local service integration)
7. **Medication Management** (interactions, adherence, pharmacy marketplace)
8. **Educational Content & Health Literacy** (culturally adapted, gamified)

5. Vision & Strategic Goals

- **Long-term vision (2030):**
 - 50M active users in 180+ countries
 - 5+ billion consultations delivered
 - 500M+ preventive health improvements
 - 15M+ lives saved through early detection
 - \$2B+ global healthcare cost reduction
- **MVP objectives:**
 - Available in 50+ countries, 30+ native medical languages
 - Works offline (2G/3G) for 2.5B people
 - AI diagnostic accuracy >85%
 - Freemium model accessible to <\$5/day income users

6. International Market Analysis

- **Digital health market size 2024:** \$260B
- **Projected 2028:** \$540B (CAGR 19.8%)
- **AI medical assistants sub-segment:** \$28B → \$89B (2028)
- **Key opportunities:**
 - Underserved regions: Sub-Saharan Africa, South Asia, Central America
 - Language barriers: 95% of apps are English-only
 - Cost accessibility: no truly affordable options for <\$2/month
 - Cultural trust: Western-centric AI loses 40% trust in non-Western markets
- **Main competitors:** Babylon, Ada, Teladoc, Ping An, DoctoLib
- **Differentiation:**
 - Global coverage 180+ countries
 - 50+ regional medical boards validating AI
 - 45+ native medical languages
 - Offline-first architecture, culturally adapted

7. Business Model

- **Freemium subscriptions** (tiered by income)
- **Marketplace commissions** (pharmacies, labs, specialists)
- **B2B partnerships** (governments, NGOs, insurers)
- Premium family plans for multi-member households

8. Success Metrics

- **Users:** 500K in 6 months → 5M by 18 months → 50M by 2030
- **Clinical accuracy:** >85%, zero AI errors
- **Health impact:** 100K+ referrals, 50K+ false emergencies avoided, 200K+ early detections
- **Revenue:** ARPU \$35–60, profitable in 24 months

9. User Personas & Use Cases

- **Amara (Sub-Saharan Africa):** Low literacy, remote, offline SMS needed
- **Chen Wei (East Asia):** Urban professional, premium telehealth, high privacy expectations
- **Sofia (Latin America):** Mother, needs quick affordable guidance
- **Dr. Raj Patel (South Asia):** Rural health worker, clinical decision support
- **Ahmed (Middle East):** Elderly patient, family-managed medication
- **Nneka (Africa):** Young mother, infant care, visual symptom analysis
- **Dr. Marie (Europe):** Generalist physician, reduce admin overload, maintain autonomy

10. Monetization Model

- **Economic philosophy:** Maximize accessibility with sustainable business model
- **Revenue streams:**
 1. **Freemium subscriptions (60%)** – PPP-adjusted pricing
 2. **Marketplace commissions (25%)** – pharmacies, specialists, labs
 3. **B2B partnerships (15%)** – governments, NGOs, insurers
- **Conversion target:** 8–12% of free users to Premium
- **Tier 3: Premium Family+:** Up to 6 members, shared consultations, 64–67% discount vs individual subscriptions

11. Opportunities & Recommendations

- **Opportunities:**
 - Large underserved markets
 - Viral adoption via family and community networks
 - Differentiation: globally validated AI, multilingual, offline
- **Recommendations:**
 - ❖ Start MVP in regions with greatest healthcare gaps
 - ❖ Promote Freemium + Premium Family+ model to increase ARPU
 - ❖ Monitor clinical accuracy and user satisfaction continuously
 - ❖ Build strategic B2B partnerships (governments, NGOs)
 - ❖ Ensure multi-region regulatory compliance (GDPR, HIPAA, PIPL, POPIA)

Conclusion:

Your Doctor combines **AI, accessibility, cultural adaptation, and offline functionality** to address a massive global healthcare gap. The project has **high social impact potential** and a **clear path to sustainable revenue** while differentiating from existing digital health competitors.
