UML Sequence Diagram – Your Doctor Application

Prepared by : FatimaZahraa Harrak

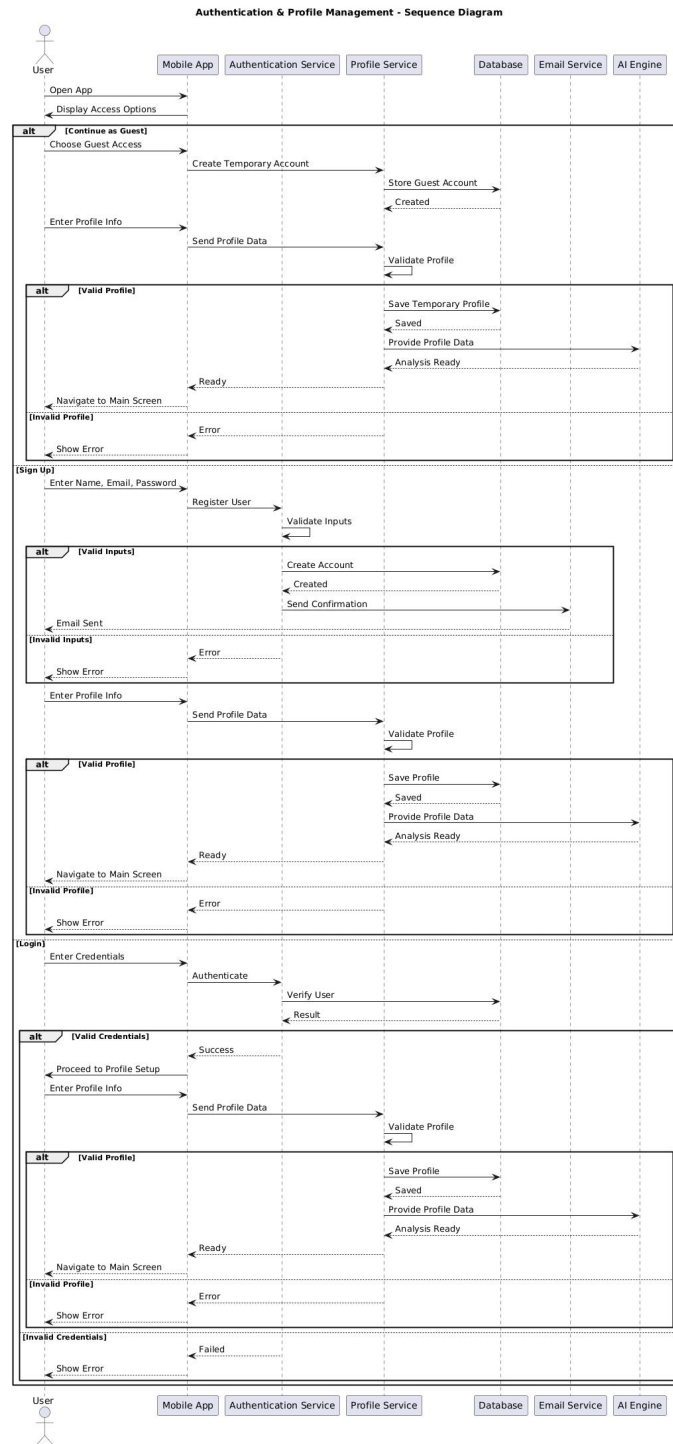

Supervisor : Mohamed Boulkassoum

This section presents the dynamic behavior of the **Your Doctor** application through a UML Sequence Diagram. The diagram illustrates how different system components interact with each other during a specific scenario. It shows the order of messages exchanged between the user and the system, highlighting how requests are processed step by step.

The sequence diagram provides a clear view of the interaction flow between elements such as the user interface, authentication system, symptom assessment module, medical guidance service, consultation history, and subscription management.

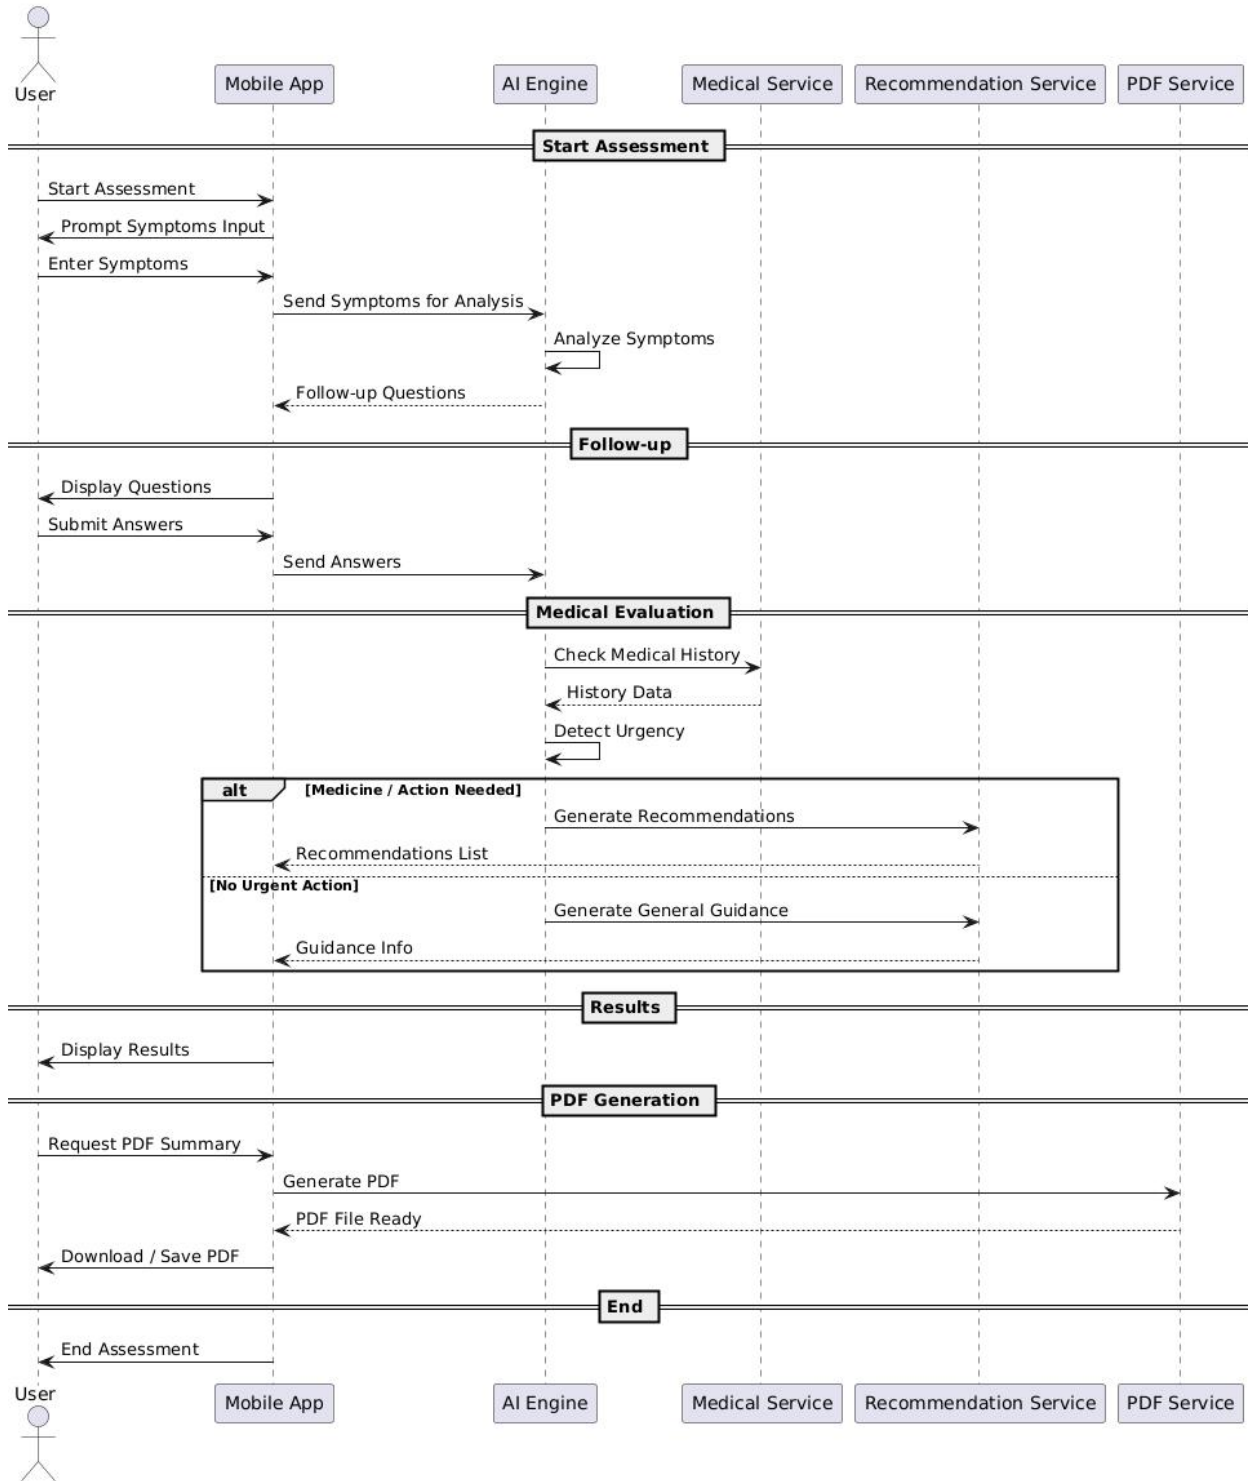

The objective of this diagram is to help stakeholders understand how the system operates in real time and how different components collaborate to deliver a smooth, efficient, and reliable user experience.

Authentication & Profile

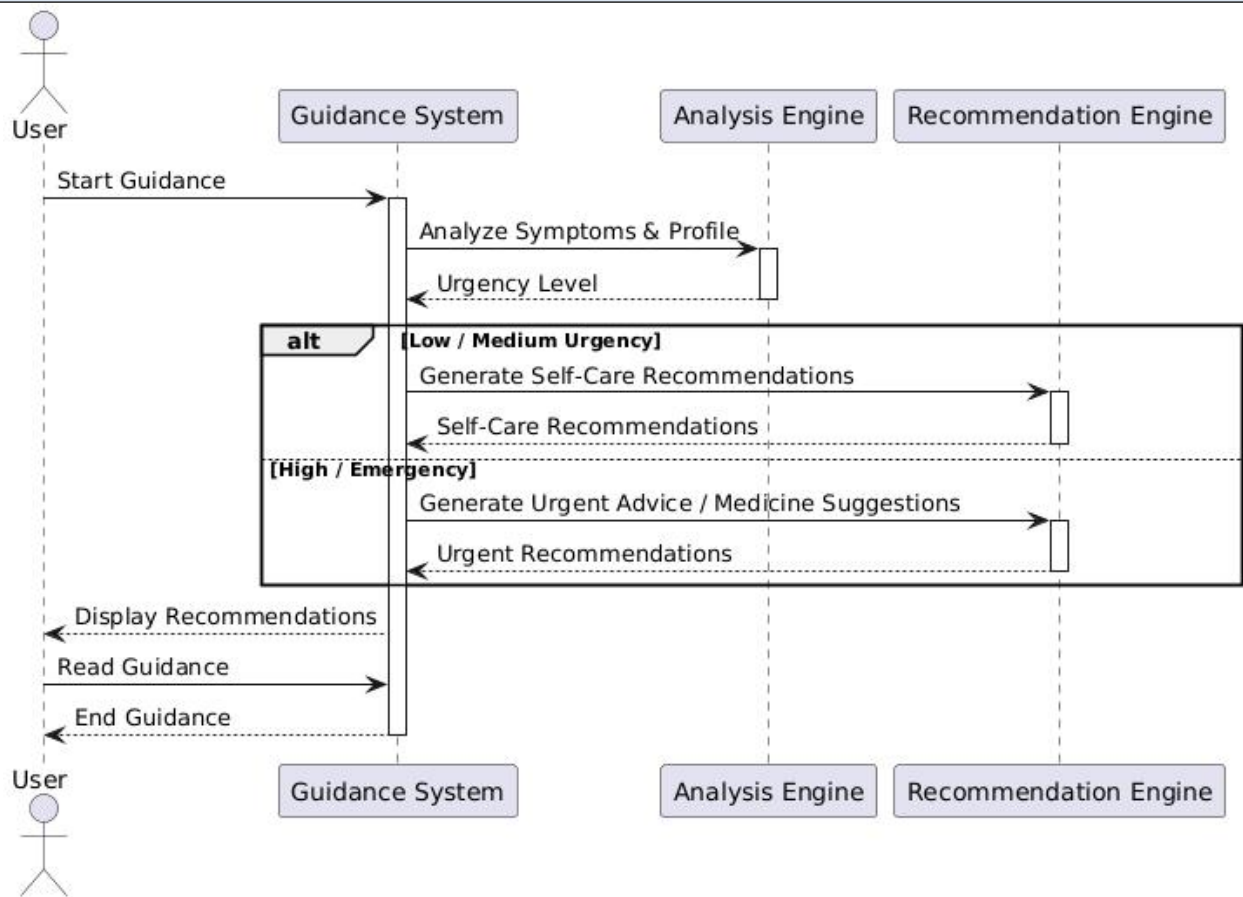

Symptom Assessment

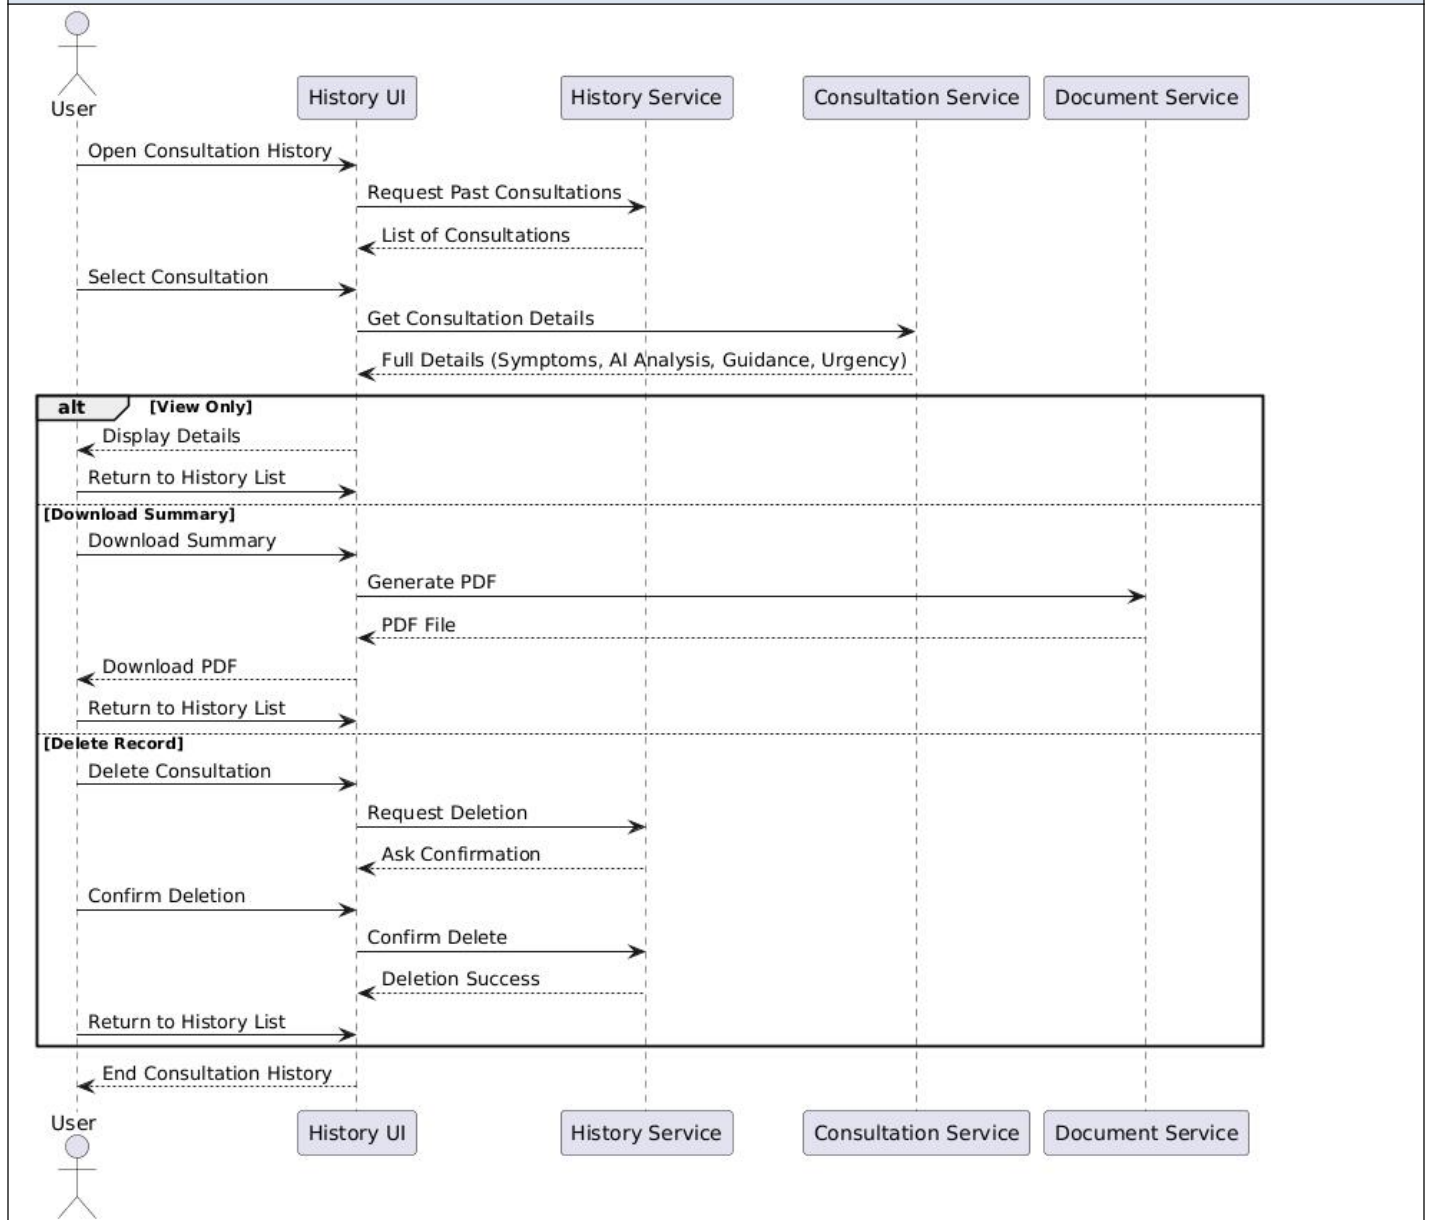

Health Assessment & Recommendation Flow

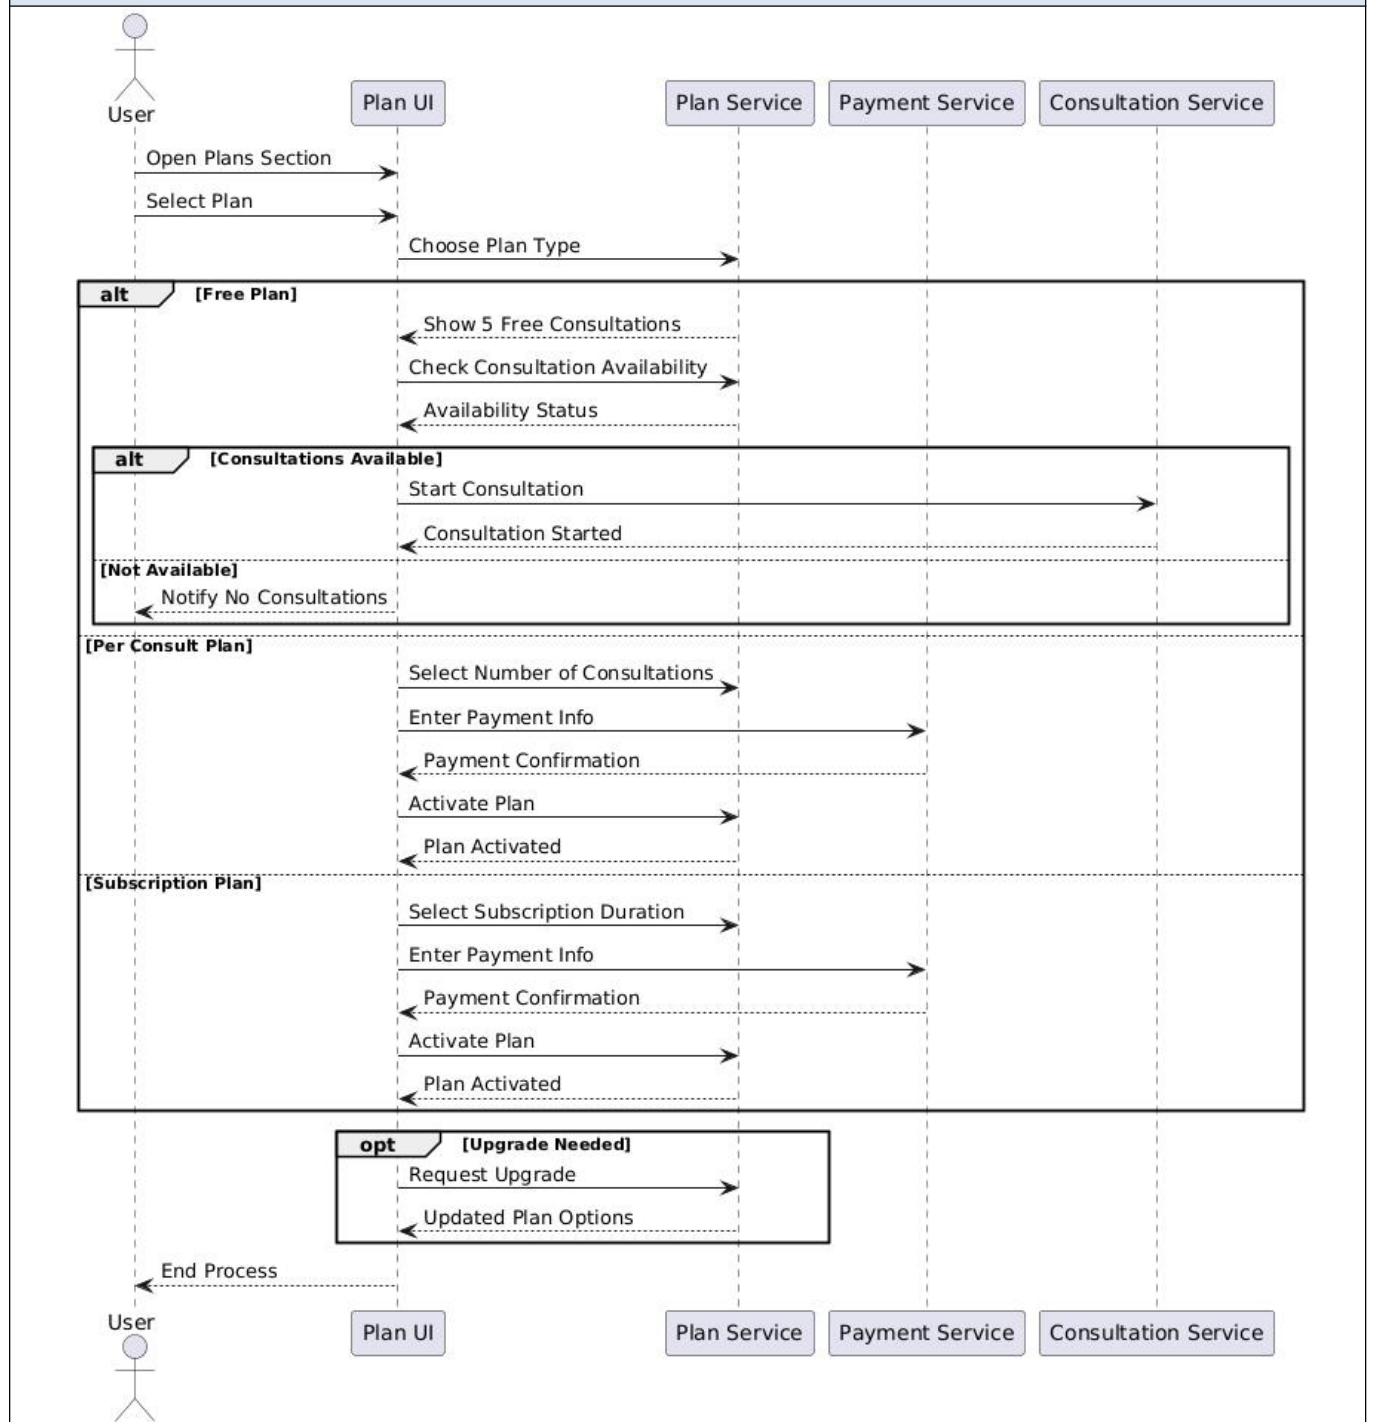

Guidance (Recommendations)

Consultation History

Plans & Paiement

Gamification
